

eDocPrinter PDF Product Level Feature Matrix

Features:	EPDFRPO	EPDFADV	EPDFENT
➤ Page Setup: Custom and user defined paper forms	V	V	V
➤ Page Setup: N-up & booklet mode	V	V	V
➤ Page Setup: Auto selected and fixed paper source	V	V	V
➤ Compression: Downsampling and compression	V	V	V
➤ Compression: Image uniqueness detection	V	V	V
➤ Compression: Automatic white opaque rectangle detection and removal	V	V	V
➤ Fonts: Subset font embedding: (OpenType, TrueType, Type1, Unicode and CJK encoding support)	V	V	V
➤ Fonts: Automatic smart quotes detection and conversion	V	V	V
➤ Fonts: Automatic soft-hyphen detection and conversion	V	V	V
➤ Fonts: [Text2Hash Addin] To scramble font encoding to prevent content text copying		V	V
➤ Fonts: [Remap Addin] User defined character encoding remapping			V
➤ Doc Info: Standard and user defined document information fields	V	V	V
➤ Doc Info: Open action and viewer preference settings	V	V	V
➤ Doc Info: PDF/A-1a and PDF/A-1b compliance	V	V	V
➤ Security: Standard PDF security and permission settings with 40/128 bit encryption	V	V	V
➤ Security: [AES Addin] Advanced PDF security and permission settings with AES 128/256 bit encryption		V	V
➤ Watermark: User defined text/image/compound watermark with selective page range	V	V	V
➤ Watermark: [Admin] Global predefined watermarks and mandatory watermarks	V	V	V
➤ Watermark: Text watermark with URL action	V	V	V

eDocPrinter PDF Product Level Feature Matrix

Features:	EPDFRPO	EPDFADV	EPDFENT
➤ Watermark: Resolving environment variables in text watermarks	V	V	V
➤ Watermark: [Adv. Variables Addin] Resolving Adv. variables (page number, date, time, and etc.) in text watermarks		V	V
➤ Links: Automatic URL and filename pattern detection	V	V	V
➤ Bookmarks: Automatic bookmark generation by text attributes matching	V	V	V
➤ Destination: Flexible saveas modes (interactive and silent)	V	V	V
➤ Destination: Merge to the existing PDF file by [Append/Insert before/Overlay onto]	V	V	V
➤ Destination: Auto-numbered the destination PDF filename	V	V	V
➤ Destination: Optimized for fast web view mode	V	V	V
➤ Destination: User defined post-action commandline for processing the destination PDF	V	V	V
➤ Destination: Overlay with/Merge with predefined PDF templates.	V	V	V
➤ Destination: Overlay with predefined PDF templates as background/foreground/inserting before/appending modes.	V	V	V
➤ Destination: Overlay with predefined PDF templates with single page repeating, even-odd page repeating, multi-page repeating, mapping one by one, prepending/appending, applying cover and back-cover of template pages.	V	V	V
➤ Destination: Overlay with predefined PDF templates as layers	V	V	V
➤ Destination: Processing sequentially mode for silent printing with synchronization	V	V	V

eDocPrinter PDF Product Level Feature Matrix

Features:	EPDFRPO	EPDFADV	EPDFENT
➤ Destination: [Embedded commands] Fully controllable destination options (e.g. saveas modes, destination path) by commands for workflow automation	V	V	V
➤ Email: Send PDF as attachment by default email client in Simple MAPI/E-MAPI/Outlook Automation modes.	V	V	V
➤ Email: Send PDF as attachment by default email client in Simple MAPI/E-MAPI/Outlook Automation modes.	V	V	V
➤ Email: Send PDF as attachment by Lotus Notes client		V	V
➤ Email: Send PDF as attachment by standard SMTP mode.	V	V	V
➤ Email: [SSL Addin] Send PDF as attachment by secured SMTP SSL and SMTP STARTTLS mode.			V
➤ Email: [SSL Addin] Send PDF as attachment by secured Gmail SMTP/IMAP extension mode.			V
➤ Email: [Embedded commands] Fully controllable email options by commands for workflow automation	V	V	V
➤ Email: Resolving environment variables in email fields	V	V	V
➤ Email: [Adv. Variable Addin] Resolving Adv. variables in email fields		V	V
➤ Redirect: [Redirect2Print Addin] Redirect the current printing job to other printers by printing the spool job file.		V	V
➤ Redirect: [Redirect2Print Addin] Redirect the current printing job to other printers by calling the PDF Reader command line or openaction.		V	V
➤ Redirect: [Redirect2Print Addin] Redirect the current printing job as images (BMP/JPG/TIFF).		V	V
➤ Redirect: [Embedded commands] Fully controllable redirect options by commands for workflow automation		V	V
➤ Redirect: [Adv. Variable Addin] Resolving session id and client name in adv. variables in the printer name argument in remote desktop (terminal server) sessions.		V	V

eDocPrinter PDF

Product Level Feature Matrix

Features:	EPDFRPO	EPDFADV	EPDFENT
➤ FTP/Cloud: Support FTP/SFTP (FTP over SSH)/FTPS (FTP over SSL) for uploading files directly after conversion.			V
➤ FTP/Cloud: Support uploading files directly to Amazon S3 after conversion.			V
➤ FTP/Cloud: [Embedded commands] Fully controllable upload options by commands for workflow automation			V
➤ Embedded commands: Support detecting commands embedded in printable text string for automating Destination/Email/Security/Doc Info/Overlay with options.	V	V	V
➤ Embedded commands: Support detecting commands embedded in printable text string for adding PDF layers.	V	V	V
➤ Embedded commands: Support detecting commands embedded in printable text string for automating Adv. pack functions like Redirect and AES encryption.		V	V
➤ Embedded commands: [Command2Action Addin] Adv. commands for adding bookmarks, comments, link annotations, images, embedded files, and etc.		V	V
➤ Embedded commands: [Command2Form Addin] Adv. commands for adding PDF form fields and etc.		V	V
➤ Embedded commands: [Adv. Variable Addin] Adv. variables used in commands for resolving variables with dynamic values like date, time, page number, destination path, and et cetera in addition to environment variables.		V	V
➤ Embedded commands: Support detecting commands embedded in printable text string for automating Ent. pack functions like FTP/Cloud Upload and PDFSealer			V
➤ Admin: Support multiple edocprinter instances with independent profile settings.	V	V	V
➤ Admin: Support simultaneous usage by multiple users in remote sessions with independent per-user settings.	V	V	V
➤ Admin: Support prohibiting to load per-user settings of specific property pages by HKLM registry settings	V	V	V
➤ Admin: Support hiding property pages by HKLM registry settings.	V	V	V

eDocPrinter PDF Product Level Feature Matrix

Features:	EPDFRPO	EPDFADV	EPDFENT
➤ Admin: Support stamping mandatory watermark and showing selectable predefined global watermarks for all users by HKLM registry settings.	V	V	V
➤ Admin: Support loading global default and MUST settings by local HKLM registry.	V	V	V
➤ Admin: [Remote2Reg Addin] Support loading global default and MUST settings from a remote server HKLM registry.		V	V
➤ Office Addin: Standard Office Addins (Word/Excel/PPT) for supporting conversion of bookmarks, links, cross references, and etc. from Office documents.	V	V	V
➤ Drag2PDF: Drag and drop UI for simplifying print to create PDF conversion.		V	V
➤ Drag2PDF:Support [Convert and merge into one PDF file] mode.		V	V
➤ Drag2PDF: Convert images (BMP/GIF/JPG/TIFF) to PDF directly.		V	V
➤ Drag2PDF: Support processing existing PDF files with applying Doc Info, Security, Watermarks, Overlay with PDF templates, and et cetera.		V	V
➤ Drag2PDF: Merge PDF files		V	V
➤ Drag2PDF: Extract/Delete/Divide/Set PDF Pages		V	V
➤ PDFSealer: Digitally signing PDF with Windows certificate management with user defined signature appearance.			V
➤ PDFSealer: Certifying PDF files without changes with digital signing.			V
➤ PDFSealer: Digitally signing and certifying PDF with SHA-256, SHA-384, and SHA-512.			V
➤ PDFSealer: Integrate seamlessly with eDocPrinter workflow for digitally signing and certifying PDF files after conversion.			V
➤ PDFSealer: Fully controllable PDFSealer options by commands for workflow automation.			V
